Projects

SMART WASTE MANAGEMENT USING IOT

Developed an IoT-based smart waste management system that incentivizes waste disposal through a rewards mechanism. Presented this project at the Smart India Hackathon, receiving valuable feedback from industry experts.

E-WORKSHOP

To design and develop a user-centric online platform that efficiently tracks and updates workshops offering vehicle repair services. This ensure vehicle owners to easily locate nearby workshops, access service details, and schedule appointments, thereby enhancing convenience and satisfaction in automotive repair solutions.

EDUABLE

An app that provides a unified platform for accessible learning, integrating features like real-time OCR-based text recognition, AI-powered sign language recognition, and text-to-Braille conversion to support students with visual and hearing impairments.
